## Biology for Engineers List of Boxes 2015 (Bold entries indicate addenda)

Box: Sushi Science and Hamburger Science	/
Box: Scientific Facts in Biology	9
Box: An Engineering Approach to Translational Medicine	13
Box: Food Transformations	46
Box: Biomass Conversion Efficiency	48
Box: Protein Separation by Gel Electrophoresis	76
Box: Controlling Electrostatic Discharge	80
Box: Arsenic and Old Lace	91
Box: The Mole	92
Box: Redox Reactions and Electron Transfer	95
Box: Geckos' Feet	99
Box: Concentration Measures	103
Box: What's So Special About Carbon?	111
Box: The Important Porphyrin Ring	115
Box: Microbial Stoichiometry	116
Box: Primitive Forms of Life	118
Box: Antioxidants	119
Box: Cellular Resting Potential	127
Box: Carrier Proteins	133
Box: Heat Shock Proteins	134
Box: Unfolded, Unstructured, and Meant to Be That Way	138
Box: Physical Action of ATP	140
Box: Respiration of Glucose	142
Box: Natural Variations on a Glucose Theme	144
Box: Fats and Fatty Acids	145
Box: Microorganisms Can Generate Electrical Current	146
Box: Cricket Thermometer	148
Box: Biocompatibility of Material Surfaces	150
Box: Dimensional Analysis	160
Box: Peto's Paradox	163
Box: What Is Beauty?	166
Box: Chaos	168
Box: Linear Least Squares Method	174
Box: How Receptors Work	191
Box: Muscle Types	194
Box: Autonomic Nervous System	197
Box: Action Potentials	199
Box: Artificial Neural Networks	207
Box: Bodily Microbes as An Information Legacy	213
Box: Parsimony Principle	228
Box: The Evolution of Hemoglobin	228
Box: Polymerase Chain Reaction	240

Box: The Chicken of the Egg?         244           Box: Ames Test for Mutagenicity         248           Box: DNA Inheritance         249           Box: Cheating Genes         254           Box: Darwin's Legacy         255           Box: Selfish Genes         255           Box: Hamilton's Rule         256           Box: Memes         258           Box: Epi-, Meso-, Endo-, and All Those Kinds of Cells         264           Box: Human Ecology System         269           Box: Naming of Genes         278           Box: How Evolution Shaped Nutrient Needs         294           Box: Codependence of Food and Genes         296           Box: The Really Big Dinosaurs Had Really Big Appetites         296           Box: Codependence of Food and Genes         296           Box: The Really Big Dinosaurs Had Really Big Appetites         296           Box: The Really Big Dinosaurs Had Really Big Appetites         299           Box: Coling Chickens         303           Box: Coling Chickens         303           Box: Coling Chickens         303           Box: Coling Chickens         303           Box: Colliderus Lizards         303           Box: Colliderus Lizards         303           Box: Call Influences Last a	Box: Genetic Diversity Repositories	242
Box: DNA Inheritance         249           Box: Cheating Genes         254           Box: Darwin's Legacy         255           Box: Selfish Genes         255           Box: Hamilton's Rule         256           Box: Memes         258           Box: Epi-, Meso-, Endo-, and All Those Kinds of Cells         264           Box: Human Ecology System         269           Box: Naming of Genes         278           Box: How Evolution Shaped Nutrient Needs         294           Box: Codependence of Food and Genes         296           Box: How Evolution Shaped Nutrient Needs         294           Box: Codependence of Food and Genes         296           Box: How Evolution Shaped Nutrient Needs         294           Box: Codependence of Food and Genes         296           Box: The Really Big Dinosaurs Had Really Big Appetites         296           Box: The Really Big Dinosaurs Had Really Big Appetites         296           Box: The Really Big Dinosaurs Had Really Big Appetites         296           Box: Cooling Chickens         303           Box: Cooling Chickens         303           Box: Cooling Chickens         303           Box: Camels and Cacti         306           Box: Preservation and Extinction         310	Box: The Chicken of the Egg?	244
Box: Cheating Genes         254           Box: Darwin's Legacy         255           Box: Hamilton's Rule         256           Box: Epi-, Meso-, Endo-, and All Those Kinds of Cells         268           Box: Epi-, Meso-, Endo-, and All Those Kinds of Cells         264           Box: Human Ecology System         269           Box: How Evolution Shaped Nutrient Needs         294           Box: Codependence of Food and Genes         296           Box: The Really Big Dinosaurs Had Really Big Appetites         296           Box: In Haman Diseases Hve Had Profound Effects         299           Box: Cooling Chickens         303           Box: Liolaemus Lizards         303           Box: Camels and Cacti         306           Box: Fetal Influences Last a Lifetime         310           Box: Preservation and Extinction         319           Box: Species Formation         321           Box: Species Formation         321           Box: Poisonous to Pets         337           Box: Evolution and Cyanide Tolerance         336           Box: Poisonous to Pets         337           Box: The First Biological Therapy         338           Box: Horight Fixed Box: Met Mail         358           Box: Horight Fixed Box: Cooperation Between Hippos and Fish	Box: Ames Test for Mutagenicity	248
Box: Darwin's Legacy         255           Box: Selfish Genes         255           Box: Hamilton's Rule         256           Box: Epi-, Meso-, Endo-, and All Those Kinds of Cells         264           Box: Human Ecology System         269           Box: Naming of Genes         278           Box: How Evolution Shaped Nutrient Needs         294           Box: Codependence of Food and Genes         296           Box: The Really Big Dinosaurs Had Really Big Appetites         296           Box: Localemus Lizards         303           Box: Cooling Chickens         303           Box: Liolaemus Lizards         303           Box: Fetal Influences Last a Lifetime         310           Box: Fetal Influences Last a Lifetime         310           Box: Preservation and Extinction         319           Box: Preservation and Extinction         319           Box: Directed Evolution as a Design Technique         323           Box: Directed Evolution as a Design Technique         323           Box: Poisonous to Pets         337           Box: Poisonous to Pets         337           Box: The First Biological Therapy         338           Box: Mysterious Foal Deaths in Kentucky         339           Box: Bioprinting         346	Box: DNA Inheritance	249
