Preface xv
Acknowledgements xvii

Part I Introduction 1

1.1 Introduction 2
1.2 Science and Engineering 2
  1.2.1 Phylogeny 2
  1.2.2 Motivation 4
  1.2.3 Methods 4
  Sushi Science and Hamburger Science 7
  1.2.4 Synthesis 9
1.3 Scientific Method 11
  Scientific Facts in Biology 11
  Examples: Development of the Scientific Method, Statistical Inference, Stem Cell Donations 13
1.4 Mathematical Modeling 16
  1.4.1 The Value of Models 16
  An Engineering Approach to Translational Medicine 17
  1.4.2 Types of Models 18
  1.4.3 Steps in the Modeling Process 19
  1.4.4 Models and Empirical Observations 23
  Examples: Mathematical Model of an Infectious Disease, Localized Estrogen Delivery Affects Neural Plasticity, A Grass-Deer Ecosystem 24
1.5 Biological Engineering 27
1.6 Expectations for Biological Engineers 30
  Examples: Environment Conditions and Human Disease, Sickle Cell Anemia 31
1.7 About Predictions 33
  Example: Predictions About Water Temperature Control Downstream from Dams Across Spawning Rivers 35
1.8 About This Book 37
Questions, Chapter 1 39

Part II Principles from the Sciences 42

2. PRINCIPLES OF PHYSICS 43

2.1 Effort and Flow Variables 45
  2.1.1 Resistance 46
  2.1.2 Capacity 48
  2.1.3 Inertia 48
Protein Separation by Gel Electrophoresis

2.11.2 Electrical Current
2.11.3 Electric Power
Example: Electroporation Allows Genetic Material to Penetrate the Cell

2.12 Temperature Effects
Questions, Chapter 2

3. PRINCIPLES OF CHEMISTRY

3.1 Periodic Nature of Elements
Mole

3.2 Chemical Bonding
3.2.1 Ionic Bonds
3.2.2 Covalent Bonds
3.2.3 Electronegativity
3.2.4 Water As a Polar Molecule
3.2.5 Hydrogen Bonds
3.2.6 Van der Waals Forces
Geckos’ Feet
3.2.7 Metallic Bonding
Examples: Wastewater Bioreactor Troubleshooting, Natural Halocarbons as Bioactive Compounds, Detection of Skin Cancer by Classification of Raman Spectra, Nitric Oxide Messenger

3.3 Chemical Equilibrium
Concentration Measures

3.4 Acids and Bases
3.4.1 Strong and Weak Acids and Bases
3.4.2 Salts
3.4.3 pH

3.5 Reaction Rates
3.5.1 Collision Theory
3.5.2 Intermediate Reactions
3.5.3 First Order Reactions
3.5.4 Enzyme-Substrate Reactions
Example: Faster ELISA

3.6 Carbon Chemistry
3.6.1 Many Possible Configurations
What’s So Special About Carbon?
3.6.2 Functional Groups
3.6.3 Amino Acids
3.6.4 Macromolecule Types
   Microbial Stoichiometry 171
3.6.5 Polymers 173
3.6.6 Melting and Boiling Points 173
3.6.7 Organic Reactions 173
   Primitive Forms of Life 174
   Example: Macromolecule Sieves 176
3.7 Physical Chemistry in Water 178
   3.7.1 Solutions 178
   3.7.2 Gels 183
   Cellular Resting Potential 187
   3.7.3 Suspensions 189
   3.7.4 Isoelectric Point 190
   Example: Clarifying Wine 190
3.8 Protein Folding 192
   Heat Shock Proteins 196
   Example: Biomarkers As Indicators of Environmental Stress,
   Biomarkers as Indicators of Disease 197
3.9 Shape Effects and Enzymes 199
3.10 Energy-Rich Compounds 205
   The Physical Action of ATP 206
   Respiration of Glucose 208
3.11 Temperature and Pressure Effects 212
   Cricket Thermometer 213
3.12 Free Energy 214
   Biocompatibility of Material Surfaces 215
Questions, Chapter 3 218

3 PRINCIPLES OF MATHEMATICS AND ENGINEERING SCIENCES 225

4.1 Equality 227
   Dimensional Analysis 228
   Example: Flow in the Pulmonary Vein 231
4.2 Randomness and Probability 234
   4.2.1 Probability Distributions 234
   What is Beauty? 237
   4.2.2 Self-Similar Data 239
   4.2.3 Pseudo-Random Data 239
   Chaos 240
   4.2.4 Statistics 242
   Linear Least Squares Method 248
   Examples: The Meaning of the Mean, Protecting Against Hyperthermia, Digestibility of Corn Silage in Sheep and Steers,
4.3 Calculus

4.3.1 Derivatives and Differential Equations

4.3.2 First Order Equations

4.3.3 Exponential Responses

4.3.4 Second Order Equations

4.3.5 Periodicity

4.3.6 Nonlinear and Nonconstant Equations

4.3.7 Integration

Examples: *Human Population of the World*, *Classroom Ventilation*, *Respiratory Work Rate*

4.4 Control Systems

4.4.1 Sensors

*How Receptors Work*

Example: *Making Bitter Food Taste Better*

4.4.2 Actuators

*Muscle Types*

4.4.3 Communications

*Autonomic Nervous System*

*Action Potentials*

4.4.4 Closed-Loop Feedback Systems

4.4.5 Open-Loop Systems

*Artificial Neural Networks (ANN)*

4.4.6 Closed-Loop Feedforward Systems

4.4.7 Adaptive Control Systems

4.4.8 Fuzzy Control Systems

Example: *The Potted Rose*

4.5 Optimization

4.6 Information

Examples: *Information Content of Micrococcus DNA*, *Entropy Value of Micrococcus DNA*

4.7 Analog and Digital Signal Processing

Questions, Chapter 4

5 PRINCIPLES OF BIOLOGY

5.1 Form and Function

5.2 Modularity and Incremental Change

*The Evolution of Hemoglobin*

Example: *Cancer Cell Drug Resistance*

5.3 Genetic Basis

5.3.1 DNA as the Blueprint

5.3.2 RNA as the Fabricator

5.3.3 Gene Types

5.3.4 Genetic Expression
### 5.3.5 RNA Interference

The Chicken or the Egg?

**5.3.6 Genetic Variation**

**5.3.7 Replication**

**5.3.8 Mutations**

Ames Test for Mutagenicity

**5.3.9 RNA Correcting DNA**

**5.3.10 Mitochondrial and Chloroplast DNA**

DNA Inheritance

**5.3.11 Plasmid DNA**

Examples: Searching For the Causes of Autism, High-Energy Radiation, Crossbreeding Tigers, Genetic Causes of Alcoholism, Biochips for Disease Detection

### 5.4 Competition and Selection

Cheating Genes

Darwin’s Legacy

Selfish Genes

Memes

Example: Natural Selection from Genetic Variation

### 5.5 Biological Hierarchies

5.5.1 The Cell

Epip-, Meso-, Endo-, and All Those Kinds of Cells

5.5.2 What is Life?

5.5.3 Synthetic Biology

5.5.4 Ecology on Micro- and Macro- Scales

Human Ecology System

5.5.5 Food Pyramid

### 5.6 Is Biology Complex or Simple?

Questions, Chapter 5

### Part III Responses of Living Systems

### 6. BIOLOGICAL RESPONSES IN CONTEXT (BRIC)

6.1 BU Die Without Water

6.1.1 Water Has Unique Properties

6.1.2 Water Surrounding BU

6.1.3 Water Balance

6.1.4 BU Barriers to Water Movement

Example: Monitoring Almond Tree Trunk Diameter

6.2 BU Die Without the Right Amount of Oxygen

6.2.1 Anaerobes and Facultative Anaerobes
6.2.2 Oxidative Metabolism 406
6.2.3 Oxygen Delivery 407
6.2.4 Too Much Oxygen 408
   Example: *Modeling of Composting* 408
6.3 BU Die Without Food and Nutrients 411
   6.3.1 Essential Elements 411
   *How Evolution Shaped Nutrient Needs* 413
   6.3.2 Food and Nutrients for Energy and Essential Biochemicals 415
   6.3.3 Nutrient Delivery 416
   Example: *Inside Food Development Labs* 417
6.4 BU Become Ill in the Presence of Wastes 419
   *Human Diseases Have Had Profound Effects* 420
6.5 BU Need Heat Sources and Sinks 424
   6.5.1 Heat Sources 424
   6.5.2 Removing Excess Heat 425
   *Cooling Chickens* 426
   6.5.3 Moving to a Better Neighborhood 427
   *Liolaemus Lizards* 427
   6.5.4 The Best Thermal Conditions 428
   Example: *Storing Platelets* 429
6.6 BU Adapt to Their Environments 431
   *Camels and Cacti* 431
   6.6.1 Cells and Microbes 433
   6.6.2 Hypertension 434
   6.6.3 Color Changes 434
   6.6.4 Adaptations to Light 435
   6.6.5 Other Adaptations 435
   *Fetal Influences Last a Lifetime* 437
   Examples: *Ecology of Piney Run Lake, Microbes in Salt Solution, Varroa Mites on Honeybees, Allergy Epidemic* 440
6.7 BU Modify Their Environments 443
   *The Prime Directive* 444
6.8 Extra Energy Will Be Spent on Adaptations 447
6.9 BU, If Possible, Will Move to Friendlier Environments 450
   *Preservation and Extinction* 451
   Example: *Wild Animals on Display* 453
6.10 BU Will Evolve Under Environmental Pressures 455
   *Evolution at Work for an Engineer* 458
   Example: *Selection of Pink Salmon* 459
6.11 Crowding of BU Produces Stress 461
   6.11.1 Antisocial Behavior 461
   6.11.2 Crowding in Humans 462
   6.11.3 Personal Space 463

6.16.2 Coevolution  
* Cooperation Between Hippos and Fish  

6.16.3 Plant Reproduction  
* Guanacast Loves Equus  

6.16.4 Communal Benefit  
6.16.5 Inadvertent Benefit  

Examples: *Soil Microorganisms Interact, Costly Signaling Theory of Ritual, Infant Formula Probiotics*  

6.17 BU Compete With Other BU  

6.17.1 Plants and Herbivores  
6.17.2 Predators  
* Spiders and the Web of Life  

6.17.3 Parasites  
6.17.4 Pathogens  

Examples: *Humans Against Food Microbes, New Corn Pest, Fighting Aflatoxin Naturally, Immunomodulation to Treat Autoimmune Diseases*  

6.18 BU Reproduce  

6.18.1 Asexual Reproduction  
6.18.2 Exchange of Bacterial Genes  
6.18.3 Somatal Cell Reproduction  
* Cancer in Humans  

6.18.4 Telomeres  
6.18.5 Sexual Reproduction  
* Silphium  

6.18.6 External or Internal Fertilization  
6.18.7 Hermaphrodites  
6.18.8 Plant Reproduction  

Example: *Shipping Animals*  

6.19 BU Coordinate Activity Through Communication  

6.19.1 Courtship  
6.19.2 Acoustic Signals  
* Human Language According to Chomsky Frequency Contents of Sounds  

6.19.3 Chemical Signals  
6.19.4 Touch Signals  
6.19.5 Visual Signals  
* Seeing Inside Us  

6.19.6 Others  
* Perception of Stimuli  

6.19.7 Just Noticeable Difference  

Examples: *Training Animals to Come When Called, Siren’s Song, Ground Squirrels Warn Rattlesnakes*  

x
6.20 BU Maintain Stability with Exquisite Control 577
  6.20.1 The Senses 577
  6.20.2 Controllers 581
  6.20.3 Redundancy 583
    *Immune System as a Model of Ultra-Redundancy* 584
  6.20.4 Antagonistic Action 592
  6.20.5 Dead Zone 599
  6.20.6 Time Delays 599
  6.20.7 Working with Biological Control 600
    Examples: *Using Antibodies, Malaria Therapy to Cure Difficult Diseases, Myoelectric Control of Prostheses, Antigens vs Antibodies* 600

6.21 BU Go Through Natural Cycles 604
  6.21.1 Regeneration 604
  6.21.2 Maturation 605
  6.21.3 Senescence 607
  6.21.4 Death 609
  6.21.5 Annual Cycles 610
    *Waves of Wildebeests* 610
  6.21.6 Monthly Cycles 613
  6.21.7 Diurnal Cycles 615
    *Sleep and Cancer* 618
  6.21.8 Cycles Shorter Than a Day 618
  6.21.9 Asynchronous Nutrient Cycles 619
    Examples: *Funky Leaf Spot, Modeling the Cycle of Seventeen Year Cicadas* 622

6.22 BU Need Emotional Satisfaction and Intellectual Stimulation 625
  6.22.1 The Nature of Emotions 625
  6.22.2 Personality 630
    *Do Apes Have Souls?* 631
  6.22.3 Neurotransmitters 633
  6.22.4 Interpersonal Interactions 634
    *Children at Play* 634
  6.22.5 Brain Development and Learning 636
    *Understanding Animals* 641
  6.22.6 Psychological Hierarchy 642
    *Human Factors Engineering* 644
  6.22.7 Social Infrastructure 648
    *Mother Bear Man* 650
  6.22.8 Mind-Body Interactions 652
    *Athletes and Illness* 654
    *Placebo Effect* 655
    Examples: *Harvesting Broiler Chickens, Wild Animal Display, Toys For Captive*
Animals, An Ergonomic Solution,  
Human Factors Shortcomings at  
Three Mile Island 656 

6.23 BU Die 660 

Crime Scene Investigation: Using Biology to Solve a  
Mystery 662 

6.23.1 Reliability Theory and Death Rates 663 
Example: Canary on a Chip 667 

Questions, Chapter 6 668 

Part IV Scaling Factors 685 

7.1 Allometric Relationships from Evolutionary Pressure 686 
7.2 Dimensional Analysis 689 
7.3 Golden Ratio 691 
7.4 Fractal Scaling Within an Organism 693 
7.4.1 Body Mass 695 
7.4.2 Body Surface Area 696 
7.4.3 Body Dimensions 697 
7.4.4 Metabolic Rate and Related Temperatures 701 
7.4.5 Oxygen Consumption 704 
7.4.6 Heat Loss 706 
7.4.7 Cardiovascular Factors 706 
7.4.8 Respiration 712 
7.4.9 Walking and Running 717 
7.4.10 Relations Involving Time 724 
7.4.11 Food and Waste 726 
7.4.12 Bird Songs 728 

Examples: Frog Jumping Model, Monkeys in  
Space, Life Support in a Large  
Animal Veterinary Medical Clinic 729 

7.5 Self-Similarity for Tissues and Organs 735 
7.5.1 Organs 735 
7.5.2 Tissues 736 
Example: Human Kidney Mass 737 

7.6 Self-Similarity in Populations 738 
7.6.1 Number of Species 738 
7.6.2 Species Range 739 
7.6.3 Population Densities 740 
7.6.4 Population Doubling Time 744 
Example: Bison Population Recovery 744 

Questions, Chapter 7 746 

Part V Utilizing Living Systems 750
or Basal State

Table A11. Respiration Rates for Fungi
Table A12. Respiration Rates for Bacteria Suspended in the Presence of Glucose
Table A13. Respiration Rates for Algae
Table A14. Respiration Rates for Lichens
